SUMMARY

I am a passionate Computer Science student with very good knowledge in Java and full-stack development. Skilled in Data Structures and Algorithms (DSA). Excited to apply my skills in a challenging position in an organization for self-improvement and contributing to the growth of the organization.

PROJECTS

NeuroVoice 🔗 | AI Voice Deepfake Detection Platform

Jan - Jun 2026 - Present

- Developed an AI-powered voice deepfake detection platform.
- Using React.js, FastAPI, PyTorch, and MongoDB Atlas.
- Designed a responsive and animated UI using React, Tailwind CSS, and Framer Motion.

Vital-Care 🔗 | JS

May 2025

- Developed a responsive Vital Care healthcare website using HTML, CSS, and JavaScript.
- Designed an intuitive user interface with smooth navigation and mobile-friendly layouts.
- Implemented interactive features such as appointment booking, contact forms, and service pages.

Weather Temperature Prediction 🔗 | Python

May 2026

- Developed a machine learning model using Linear Regression to predict weather temperature from historical weather data.
- Performed data preprocessing, feature engineering, and data cleaning to improve prediction accuracy and model performance.
- Visualized actual vs. predicted temperatures and feature correlations using Matplotlib to analyze model performance.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, C, C++, Python
- **Technologies:** React, Node.js, Express.js, MongoDB, MySQL
- **Concepts:** Object-Oriented Programming (OOP), Computer Networks, REST APIs
- **Version Control:** Git, GitHub, Linux

CERTIFICATES

- **DSA with JAVA** — Apna College (January 2026)
- **Database Management System** — Infosys SpringBoard (September 2025)
